

Sneha Chandanshive

Senior Data Analyst

AI-Driven Automation | LLM & Advanced Analytics | Research-Backed Decision Intelligence

"Data creates value only when it earns trust."

Driven by this belief with overall 14+ years experience, I aspire to build intelligent, transparent, and scalable analytics ecosystems that enable organizations to make confident, research-backed decisions. With over a decade of experience across ESG governance analytics, financial research, and AI-led automation, my goal is to lead high-impact analytics teams that transform complex data into actionable insights, strengthen governance frameworks, and accelerate business outcomes through ethical, resilient, and future-ready data solutions.

PROFESSIONAL SUMMARY

ESG, Governance & Risk Analytics

- Years of experience delivering high-integrity ESG, governance, and risk analytics supporting institutional research, ratings, and regulatory-aligned decision frameworks.
- Proven ownership of end-to-end Governance Quality Rating systems, ensuring scoring accuracy, methodological consistency, and audit-ready outputs.

Advanced Analytics, Automation & AI

- Specialized in building Python-led automation frameworks, reducing manual validation effort by up to 60% and improving turnaround times across high-volume data pipelines.
- Hands-on experience integrating LLMs and Generative AI models to preprocess vendor data, extract insights, and streamline analytics workflows.

Data Engineering, CI/CD & Scalability

- Designed and implemented CI/CD pipelines for automated testing, regression validation, and reporting at scale, handling datasets exceeding 5M records.
- Strong command over SQL-based data modeling, multi-source integrations, and production-ready analytics deployments.

Leadership & Stakeholder Management

- Trusted team lead with experience mentoring analysts, coordinating with research SMEs, product owners, and leadership teams to drive delivery excellence.
- Adept at translating technical complexity into executive-ready insights through dashboards, reports, and governance metrics.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, R AI & Automation: Generative AI, LLM Integration, Microsoft Azure OpenAI, Prompt Engineering

Visualization & Applications: Streamlit, Tableau, FastAPI Financial & Research Platforms: Bloomberg

Project & Workflow Tools: JIRA, Agile / Scrum Data Engineering & DevOps: CI/CD Pipelines, Docker, Git

WORK EXPERIENCE

Senior Associate – ESG & Governance Analytics

ISS-STOXX (Jul 2021 - Present)

- **Lead and mentor** a team of four analysts, managing delivery across **governance, ESG ratings, and climate data initiatives**.
- Own end-to-end **Governance Quality Rating systems**, ensuring scoring accuracy, methodological rigor, and timely releases.
- Design and execute comprehensive testing strategies, including **regression and edge-case validation**, to ensure production readiness.
- Drive automation of data pipelines, validation frameworks, and reporting workflows using **Python, SQL, and CI/CD**.
- Collaborate with research teams, business SMEs, and leadership to resolve **design gaps, RCA findings, and delivery blockers**.
- Develop **executive-facing dashboards and analytics applications** for governance, risk, and ESG performance monitoring.
- Maintain structured **weekly reporting and delivery governance** across multiple concurrent projects.

Achievements:

- Led the migration of legacy **R programming** codes into **Python 3.11**, enhancing codebase maintainability and execution speed.
- Developed a custom **LLM-based analytics** system to monitor Jira workflows and **team sentiment, providing key insights into bottleneck identification and defect resolution**.
- Designed an **LLM-driven validation framework** to assess **API responses** by converting payloads into structured DataFrames and reconciling them with **SQL data sources, enabling automated anomaly detection and ensuring data consistency across systems**.
- Automated validation and regression testing across millions of records, reducing data defects by **80%**.
- Implemented **CI/CD pipelines** that scaled **automated processing to 5M+ records**, cutting multi-day jobs down to under an hour.
- Automated data validation workflows using **Python, SQL, and regex-based rules, reducing manual effort by 60%**, and built a **Streamlit** application to enable business users to perform validations independently.
- Enabled leadership decision-making via **interactive risk and governance dashboards** used in quarterly reviews.

Senior Research Analyst

ARP Investments (Nov 2011 - Dec 2020)

Equity Merger Arbitrage Strategy

- Supported a **hedge fund with \$1.5B+ AUM**, managing analytics for deal tracking and portfolio reconciliations.
- Built analytics tools for **portfolio performance, transaction cost analysis, and universe expansion** using **Bloomberg and QA Direct**.
- Enhanced risk models by introducing additional quantitative factors into portfolio construction.

- Developed a **logistic regression** model to predict **M&A deal** success vs. failure risk, improving investment screening.
- Skilled in managing deal flow processes for **M&A strategy**, event-driven research on corporate restructuring transactions including **carve-outs, spin-offs, divestitures** and conducting in-depth portfolio risk analysis.

Multi-Strategy & Client Analytics

- Partnered directly with Portfolio Managers on multi-strategy investment frameworks.
- Produced **daily and monthly attribution, exposure, and allocation reports** for client deliverables.
- Designed **SQL databases and Python analytics** pipelines for research and reporting.
- Led onboarding and servicing of institutional clients across consultant platforms (eVestments, Callan).

Achievements:

- Strengthened investment decision-making through refined risk models and deeper factor-based analysis.
- Improved accuracy and transparency of deal-flow and arbitrage performance reporting.
- Secured new mandates through high-quality analytics-driven pitch materials and automated client reporting.
- Streamlined DDQ responses and client deliverables through Python-based automation.

EDUCATION & CERTIFICATIONS

- **Generative AI for Business (Microsoft Azure OpenAI)** – Great Lakes Institute of Management (2025)
- **P.G. Diploma – Data Science & Business Analytics** – Great Lakes Institute of Management (2023)
- **P.G. Diploma – Actuarial Science** – YCMOU, Mumbai (2010)
- **B.Sc. Mathematics** – D.G. Ruparel College, Mumbai (2008)
